

THE WESTSTAR WAY

At WestStar, we understand that our patients need more than just standard treatment. Just as important as our state-of-the-art, conveniently located facilities is what we call The WestStar Way. What is The WestStar Way? At WestStar, our patients receive the finest therapy services offered, but we also understand that they may need an extra word of encouragement, a pat on the back or just a smile, all of which can be as important as the treatment itself. We take that approach with every patient, no, every person, who walks into our treatment centers. We realize that every patient striving to come back from an injury deals with the uncertainty surrounding the recovery process and the emotional stress it can bring. This approach to treating the person, and not just the injury, is what the WestStar Way is all about.

OUR MISSION

At WestStar, we are focused on one goal: helping the patient get well. We ensure the proper care and treatment of the patients entrusted to us by the physicians and surgeons serving the Southern California area. We strive to be an extension of the physicians themselves, providing the same level of care and attentive treatment that they provide to their patients every day. We work hand-in-hand with physicians to help each patient attain or exceed the level of activity and functionality they had prior to the injury.

FOUNDED IN 1980

HISTORY

A lot has changed since our founding in 1980, but the values that guide WestStar have not. The enduring principles that guide everything we do are what is known as The WestStar Way, and they are more important than they have ever been. The WestStar Way is the embodiment of our values in action, our experience at work, and our continuous pursuit to treat patients with the same care and attention that physicians themselves do.

The WestStar Physical Therapy Network was founded by physical therapists who sought

to return to the days when the patient came first. As we built a reputation for hands-on, attentive patient care and successful therapy approaches, it was clear that the original clinics located in Long Beach, City of Industry, Montclair, and Montebello would not adequately serve their respective regions, let alone the rest of the Southern California basin. Over the last two decades, one by one, WestStar has established locations with patient convenience in mind. Today, WestStar serves Southern California through its 100 plus therapy centers and its headquarters in Cypress, California.

WHAT OUR PATIENTS SAY ABOUT US...

"I could not get off of work early enough to get to the clinic for my therapy. But one of the therapists stayed after hours for each of my sessions to make sure I stayed on my doctor's plan."

**PATIENT, WESTSTAR PHYSICAL THERAPY NETWORK
MONTEBELLO, CALIFORNIA**

"They treat you like a person, not just a patient."

**PATIENT, WESTSTAR PHYSICAL THERAPY NETWORK
RIVERSIDE, CALIFORNIA**

"WestStar takes the burden off of my staff of scheduling my patients and working out the insurance paperwork. My staff has enough to do already."
